

Shareware from Interpex

IX1D version 2 \$499*

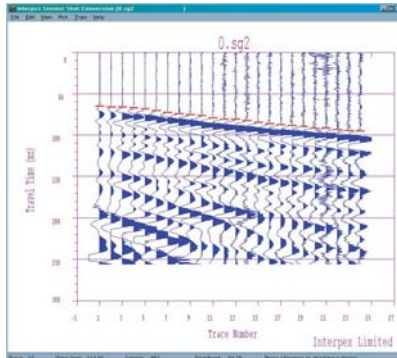

Low Cost 1D Sounding Interpretation

- 1-D Forward and Inverse Modeling for DC Resistivity, IP, MT, Frequency EM and EM Conductivity soundings
- Fix and Free parameters for Inversion
- Smooth and Layered Model Inversion
- Equivalence Analysis
- Generic ASCII data Import
- User definable axis parameters
- Spreadsheet editing of data and model
- Models in terms of depth or thickness

IXSeg2Segy: \$299*

Seismic trace display, processing, format conversion and first break time picking

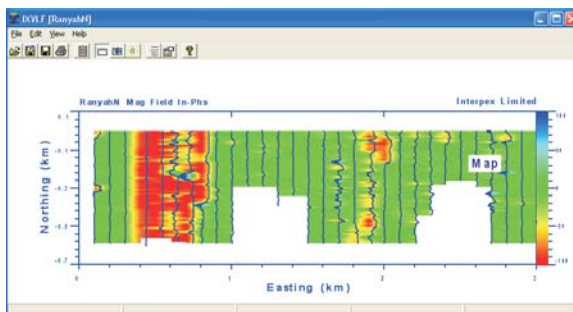

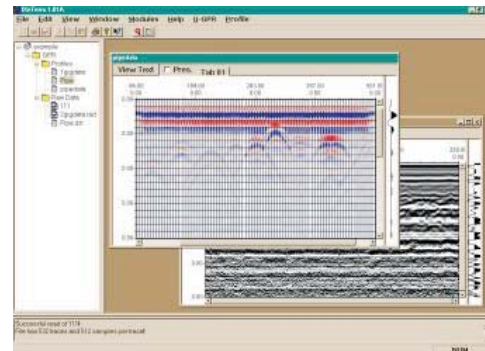

- Automatic import of SEG-2, SEG-Y and most historic SEG-1 formats
- Conversion to SEG-2 or SEG-Y
- Import of non compliant SEG-Y
- Import of user-defined Binary Format
- Import/Export of ASCII files
- Automatic/manual break picking
- Bandpass & F-K filtering
- Simple Refraction & Reflection Interpretation
- Shot header editing
- ASCII Export of picked times

IXGPR \$499*

Low Cost Ground Probing Radar Processing & Display

- Supports most commercial radar systems
- Powerful raw data processing
- Simultaneous batch processing of multiple lines
- Complete control of plot layout on paper
- Data tree for data navigation
- User controllable screen layout

IXVLF \$299*

VLF Processing and Display Software

- Displays and processes VLF data taken with most available commercial VLF systems.
- Displays Fraser and Hjelt filtered data, or magnetic field in-phase/quadrature or tilt angle/ellipticity.
- Hjelt filtered data can be displayed as depth sections.
